# Thibault Dubois.

**> Web Developer** — JavaScript · Vue · React · Node

thibaultdubois@nspace.link  Driving licence (B)  linkedin.com/in/tdbs  github.com/t3hx

## // profile

Coming from the digital analytics world, I have transitioned into web development with a genuine passion for JavaScript, on both the front and back end. Versatile by nature, I combine an analyst's rigour with creativity, and I leverage AI at every stage of building web applications, from prototype to production, to deliver products that precisely meet business and user needs.

*"A man who does what he loves is never alone" — V.T Rey*

| languages | JavaScript, TypeScript |
| frameworks | Vue.js, React, three.js |
| back-end | Node.js |
| databases | SQL, No-SQL |
| ai | Claude Code, Codex, Harness |
| cloud | GCP, Cloudflare |
| tooling | Git, Asana, Jira |

## // experience

**2026 – present**

### Career transition to web development

Self-directed training & personal projects

- Vue.js training (Composition API, Pinia, Nuxt) — vueschool.io certifications
- React training (hooks, state management, ecosystem)
- AI-assisted development: Claude Code, Codex, agents and API integration
- Harness engineering: tooling and evaluation environments for AI agents
- Web projects built: **Portfolio**, **Solarsys**, **Owlog**

**2020 – 2025**
Aug → Dec

### Senior Technical Consultant, Digital Analytics

@ Optimal Ways

clients: Decathlon FR / CH / SG / PRO · Brico-Dépôt · Midas · Cyrillus · Armand Thiery · Brady Seton · Mobalpa

- End-to-end project management (full ownership of contract renewals)
- Data analysis, quality assurance, analytics strategy and UX consulting
- Built tools for data integration and processing (JS, Node.js)
- Processing of collected data in BigQuery (GCP) and Azure Cloud
- Integration and migration of analytics tools: GA, Piano, Adobe
- Designed and built the agency's internal information system
- Team management: planning, internal/external training and onboarding of new hires

**2019 – 2020**
Jan → Aug

### Application Manager (Maintenance & Operations)

@ IDKIDS Group

- Gathered requirements from e-commerce business teams and wrote use cases
- Organised sprints and prioritised tasks with development teams
- Database extractions for management control
- Handled priority customer-service issues (run / L2 support)
- Technical on-call duty and quality assurance during production releases

**2018 – 2019**
Feb → Jan

### Data Consultant

@ Web Transition

clients: KingFisher · IDKIDS Group

**2015 – 2018**
Jan → Jan

### L2 Support Technician

@ OVHcloud · Bare Metal / Cloud servers

- Handled and prioritised critical incidents with DevOps and SysAdmin teams
- Remote server interventions (Proxmox, VMware, SSH), phone troubleshooting for unmanaged customers
